

Elan Drug Technologies

Corporate fact sheet

Elan Drug Technologies (EDT) is the world's leading drug delivery company and is a business unit of Elan (NYSE:ELN).

As a fully integrated drug delivery business, we deliver clinically meaningful benefits to patients, by using our extensive experience and proprietary delivery technologies in partnership with pharmaceutical companies to develop new and innovative products.

Established 40 years ago, we have been applying our skills and knowledge from product concept development, right through to full scale commercial manufacturing. We have been, and continue to be, the drug delivery company of choice for many of the world's largest pharmaceutical companies. We offer our clients unrivalled drug delivery expertise with a suite of commercially launched, proprietary, technology-driven solutions. From NanoCrystal® technology for poorly water soluble compounds, to customised oral drug technologies, we have a strong track record of innovation and experience. Our manufacturing and development facilities are based in the United States and Europe. Today, products enabled by our technologies are used worldwide by millions of patients each day.
